

Commitment Statement

on adherence to the Green Gold Label Program Principle and Criteria

Northflare Energy management hereby formally confirms its unwavering commitment to the full implementation and strict compliance with all requirements set forth under the Green Gold Label (GGL) Program Principle and Criteria.

Northflare Energy shall ensure that we have all necessary resources to implement and maintain GGL chain-of-custody procedures.

Northflare Energy ensures that all involved staff demonstrate full awareness of the relevant GGL procedures and competence in implementing the GGL requirements at any given time.

Northflare Energy will perform internal audits regularly and at least on an annual basis to ensure that a solid and reliable GGL management system is in place to cover all applicable GGL requirements.

The accurate implementation of the applicable GGL procedures is ensured by mandatory review of top-level management. Any identified non-conformity with the standard requirements will be addressed without delay and within the designated timeline for conformance.

This Commitment is applicable for the business activities of Northflare Energy A/S
